

CLICPROTECT

Maximum Security Chain Link Fabric

In keeping with its widely-known policy of supplying products which meet new security related demands, CLIC offers the ultimate in high security chain link fencing the "CLICPROTECT" Maximum Security Fabric.

Attractive to look at, but effective in use.

Attractive to look at but effective in use, this "CLICPROTECT" fabric is available in mesh sizes as small as 16 x 16mm; it can be used for a variety of high security and anti-terrorist applications both military and civil, indoors and out, particularly for blast containment.

Blast Containment:

Explosions have unfortunately become an almost daily occurrence around the world. Bombs and other devices are being exploded in places frequented by the innocent public as well as in areas classified as high security. In all cases, however, explosions cause a heavy loss of life and damage to property, mostly from flying shrapnel. The "CLICPROTECT" Maximum Security chain link mesh is a useful method of containing the passage of flying glass, stone or metal fragments which generally accompany a strong explosion. Abroad, similar chain link is being used more and more for blast containment.

Architectural Use

Interior decorators, architects and house owners find countless uses for this attractive and colourful small mesh. With "CLICPROTECT" security becomes beautiful.

The small size of the mesh makes the "CLICPROTECT" fabric:

Unclimbable Finger and toe holds cannot be found.

Unpenetrable Gun muzzles, knives and other Weapons cannot penetrate through it.

The use of "CLICPROTECT" Maximum Security fabric is recommended for anti-terrorist and architectural applications in:

- Airports
- Oil refineries
- Petrochemical Plants
- Power Stations
- Police Stations
- Off-Shore Oil
- Drilling Platforms
- Desalination plants
- Sports Facilities
- Prisons
- Places of Public Importance
- Shopping Centers
- Embassies
- Hospitals
