

CLIC Razor Tape

CLIC Razor Tape Concertina in galvanized or stainless steel finish can be used where additional security is required.

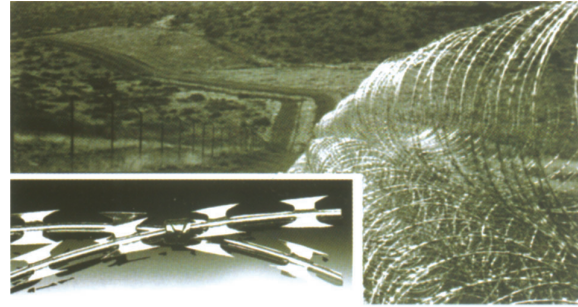

Razor Tape is fabricated from a high tensile wire virtually impossible to cut by standard tools.

Razor Tape designed to prevent intrusion along perimeter, can be installed on top or bottom of chain link fence, on a wall horizontally or vertically or even on ground to get quick crowd control for emergency.

Razor Tape can also be installed on Pyramid shape to get maximum security.

CLIC Razor Tape is available in Mobile Barrier System, which can be used by Police, Military and Government Authorities to protect the properties, public & VIP's etc.

CLIC Razor Tape is available in diameter of 450mm, 700mm & 950mm in short, medium and long barbs configuration.
