

CLICSECURE Concertina Barbed Wire

CLICSECURE Heavily Galvanized "Concertina" Barbed Wire.

Each roll of concertina barbed wire consists of single high tensile line wire which is spirally coiled. Barbs are fixed at regular intervals. The turns of the concertina are inter-connected at regular distances around the circumference by means of clips, to form diamond meshes upon extension. When extended to its full length, the concertina unfurls easily and provides a cylinder-like barrier.

"CLICSECURE" Concertina Barbed Wire provides instant reliable and economical security for vital installations.

It can be set up quickly and easily on top of existing fences and solid walls, in ditches, on roof tops or by itself on the ground.

	CLICSECURE - 100	CLICSECURE - 70	CLICSECURE - 45
Approx Diameter	1.0 M	0.70 M	0.45 M
Approx Extended Length	15.00 M	15.00 M	5.20 M
Approx Turns	68 + / - 1	68 + / - 1	34 + / - 1
Packing	15 coils / bdle	15 coils / bdle	15 coils / bdle
Lifting Handles	2	2	2

Single high tensile steel line wire :

- Diameter : 3.0mm+ /- 0.05mm
- Tensile strength : 1235 N/mm2

Low Carbon Steel Barbing Wire :

- 4 barbs
- Diameter : 2.0mm +/-0.05mm
- Tensile Strength : 350/925 N/mm2
- Length of Barbs : 13-20mm
- Distance between barbs : 60mm + / -16mm

Galvanization to BS 443

- Line wire : 275 g/m2
- Barbing wire : 240 g/m2
